

FOR IMMEDIATE RELEASE

MURDER AT GREEN SPRINGS: THE TRUE STORY OF THE HALL CASE,  
FIRESTORM OF PREJUDICES.

[Newport News, Virginia] The award-winning book by J. K. Brandau exposes Virginia's most outrageous murder case. A generation repressed the sensation. Scholars overlooked it. Rediscovery saves the legacy.

The 1914 shooting death of Victor Hall, a young, merchant and depot master, energized regional headlines for seven months. Investigators ignored men with motives while detectives, officials and newsmen accused the hapless widow. Extreme situations forced the woman's arrest and trial. Yellow journalism and southern politics secured conviction in a courtroom circus and repelled intervention by the governor. Embarrassments concealed facts for nearly a century.

The dramatic narrative speaks to both casual and serious audiences. The work freshly illuminates social, political and legal aspects of an era and rescues a significant history from extinction. Drawings, maps, photographs, endnotes and bibliography support text. Thorough documentation invites derivative research. Release date is December 1, 2007 by Morgan James Publishing.
